Informazioni sul volume

This book provides a definition and classification for Sovereign Wealth Funds (SWFs) and discusses their phenomenon within the legal context. It focuses on international and national regulation, addressing the issue of the most appropriate regulation that would ensure two apparently conflicting goals: the protection of SWF investments and of host states' legitimate concerns for vital national political or economic interest.

Moreover, this book identifies the rules applicable to SWFs and focuses on the bilateral relationships between states, considering whether SWFs may enjoy immunity with respect to host state measures as well as protection in Bilateral Investment Treaties.
