Informazioni generali

Autore: Ilaria Espa

Titolo del volume: Export Restrictions on Critical Minerals and Metals: Testing the Adequacy of WTO Disciplines

Casa editrice e luogo di stampa: Cambridge, Cambridge University Press

Anno di pubblicazione: 2015

Pagine complessive e costo del volume: pp. i-379; £79.99

Informazioni sul volume

Conventional wisdom on the insufficiency of existing WTO disciplines on export restrictions has triggered momentum on the issue. In this book, Ilaria Espa offers a comprehensive analysis of the scope and coverage of WTO disciplines on export restrictions in light of emerging case law. She investigates whether such rules still provide a sufficient, credible and effective framework capable of preventing abuses in the use of export restrictive measures on critical minerals and metals during a period of economic crisis and change in international trade patterns. Giving a broad overview of the export restrictions applied to these materials, Espa identifies distinctive features in the proliferation of export barriers and analyses the existing WTO rules to reveal their gaps and inconsistencies. She goes on to present solutions based upon her findings with the aim of bringing more coherence and equity to WTO rules on the export side.

- Explains the specific features of export restrictions on critical minerals and metals as well as offering a complete overview of the present wave of export restrictions applied on other commodities
- Analyses scope, gaps and inconsistencies of existing WTO disciplines on export restrictions in light of recent case law
- Discusses the issue of policy space left to WTO Members in light of relevant international law principles, engaging in the development of the debate over export restrictions
- Advocates an alternative framework for reforming of existing WTO disciplines on export restrictions
