Informazioni sul volume

This book makes a significant contribution to the comprehension of the law and practice of provisional measures issued by international courts and tribunals, including international commercial arbitration. After having analyzed the common features of provisional measures, it provides an overview of the peculiarities of these orders within the context of different international proceedings (e.g. the ICJ, the ITLOS, the CJEU, the ICC, human rights courts and investment arbitration). In this regard, the book is valuable in offering a broad and rigorous comparative analysis between the various forms of provisional measures.

Owing to its original cross-cutting and case-driven approach, the book will be an essential tool for both scholars and practitioners dealing with the law of provisional measures in international adjudication. Indeed, this book will be an important novelty in international law libraries due to the broad range of regimes scrutinized and to a detailed analysis of the general trends within the contemporary law of provisional measures.
