Titolo

DIGital EurOpe for Multi-Speed intEgraTion and democRacY (DIGEOMETRY)

Anno/i finanziamento

2025

Ente beneficiario

Università degli Studi di Urbino

Responsabile

Edoardo Alberto Rossi - Francesca Rosa

Breve descrizione

Recent global developments have demonstrated that European integration constitutes a fundamental pillar in which sustained investment is required. At the same time, it is essential to empower students and young people by fostering a strong sense of European culture and identity. Within this context, digital policies must be given particular consideration, as they will play a decisive role in advancing the process of European integration. The DIGEOMETRY project is designed to: • Disseminate knowledge concerning European integration; • Promote active European Digital Citizenship and the core values of the European Union, while addressing threats to democracy in the digital sphere; • Foster tolerance, mutual respect, and constructive relations beyond the borders of the European Union; • Strengthen the impact of teaching and learning through enhanced cooperation between academic and non-academic communities, encouraging dialogue on diverse legal systems and national identities. DIGEOMETRY aims to enhance the knowledge and awareness of key target groups (notably students and professionals) regarding the interconnection between European integration and the pervasive use of digital technologies, to build synergies and collaborations and to deliver a usable framework about the relevant social, political and legal factors that deserve the attention of policy-makers and stakeholders.
